Key Takeaways

Our view: Too Fast, Too Furious accurately depicts the current backdrop with soaring inflation, rapid increases in interest rates/yields, whip-saw markets, and a material deceleration in the global economic growth outlook. To say that the environment has changed quickly since the beginning of the year would be an understatement, rather it's been Too Fast, Too Furious. But it is now clear that central banks in advanced economies will raise interest rates even further than our prior above-consensus forecasts, making the current tightening cycle the most aggressive we have observed in three decades. While this may be necessary to tame inflation, it will come at a significant economic cost. In particular, we expect a global recession to unfold in 2023, which will be more severe in some regions and milder in others. Thus we continue to expect the level of uncertainty to remain very elevated, with “fewer and fewer places to hide” amid all the worrisome headlines or “wall of worries” as we like to refer to them as. But for longer-term-oriented, patient, and prudent investors, we continue to see many places to invest today. Despite all the uncertainties on the horizon, below are a few **certainties** investors should keep on mind:

- **It pays to stay invested - avoid the temptations to time the market; it's a losing proposition for even the smartest minds (e.g., Long-Term Capital Management).**
- **Ignore the headlines/noise and remember to be “fearful when others are greedy, and greedy when others are fearful” – Warren Buffett.**
- **Stay rational when markets/investors appear to be behaving irrationally.**
- **Ignore your emotional tendencies and stick to your plan; otherwise, you may end up buying-high & selling-low.**
- **Volatility/market sell-offs should be expected and are NORMAL even during broader bull market cycles!**
- **Diversification + Asset Allocation = **

Uncertainty – A Major Theme for 2022

Volatility Measures Spike in 2022..

**The U.S. & Canadian Economies –
“the cleanest dirty shirt” in the laundry**

Real GDP Growth Has Fallen from the Peak

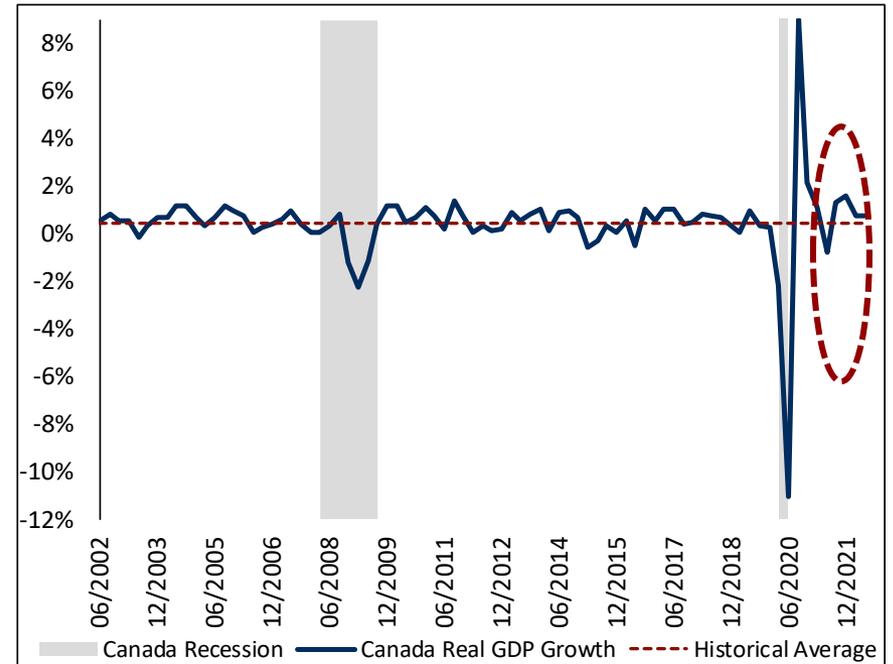

We have observed a coordinated slowdown as a result of policy tightening efforts by central banks globally. This has resulted in downward revision to 2022 and 2023 global real GDP growth forecasts across both advanced and emerging economies, which we believe has room to fall further.

A “Technical” Recession In the U.S. (QoQ % chg.)

Source: FactSet; Raymond James Ltd.; Data as of 06/30/2022.

Canadian GDP Still Positive but Slowing (QoQ % chg.)

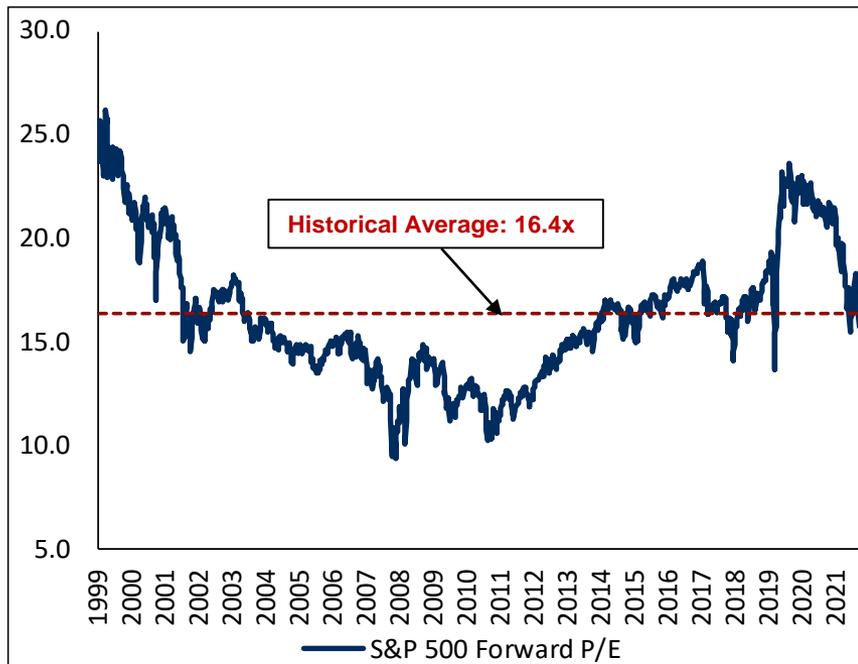

Source: FactSet; Raymond James Ltd.; Data as of 06/30/2022.

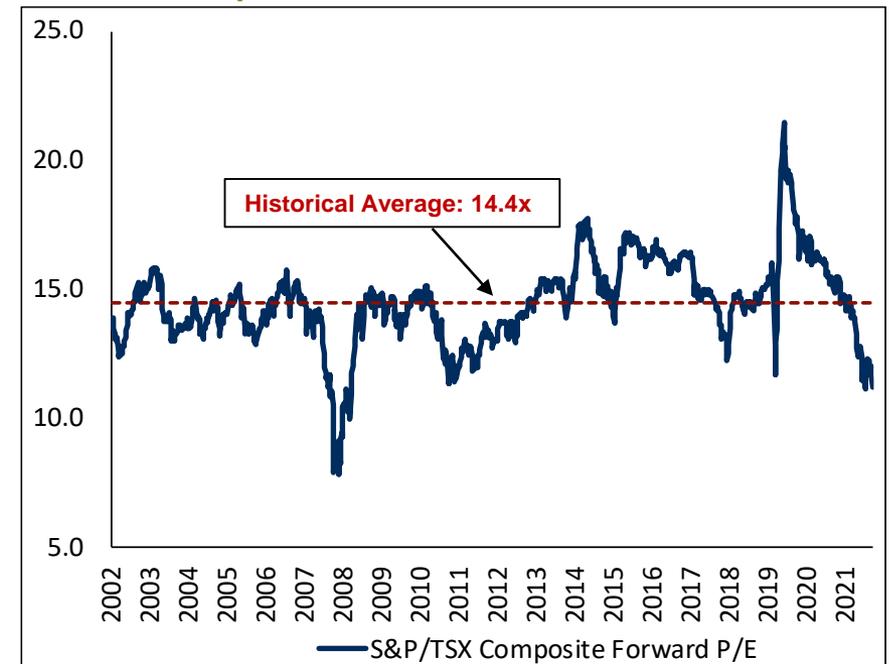

Attractive Risk-Reward

With the continued rise in yields globally, valuations have fallen in tandem. Equities appear more attractive than at the beginning of the year, offering investors a more compelling risk-reward profile. While valuations for the S&P 500 index has fallen back to its long-term historical average, the S&P/TSX index is trading at ~11x NTM earnings (versus the 20-year historical median of ~14.4x). While we continue to see further downside earnings risks, we suggest investors remain highly selective and focus on owning high-quality businesses with durable earnings/free cash flow streams throughout the entire business cycle.

Our Advice To Investors – Focus On The Big Picture!

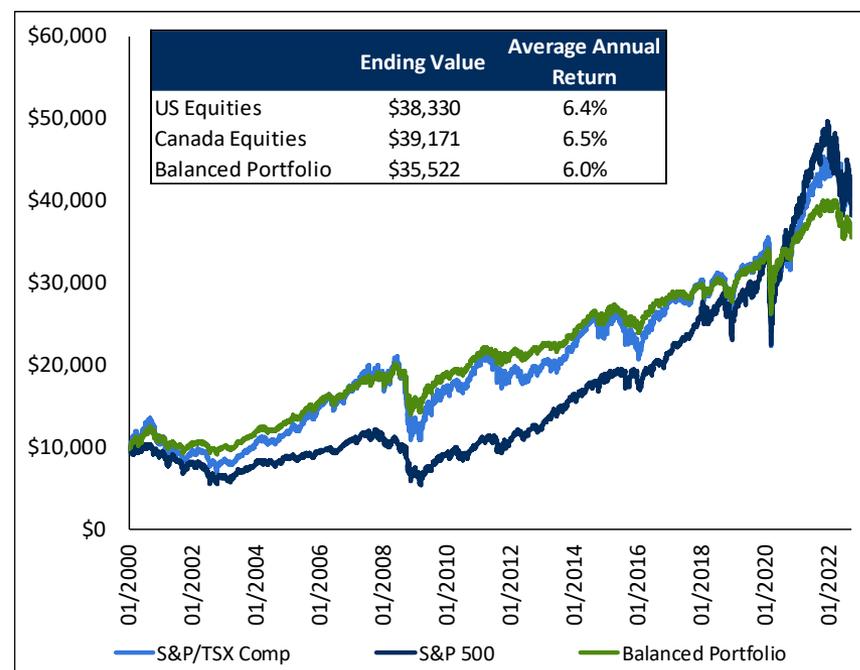

Market Moving Headlines Come & Go...

While it may be difficult to avoid all the “sharp corners” (periods of volatility/sharp sell-offs) in the market cycle, we remind investors that markets have continued to rally higher over the past ~21 years despite all the headlines/dire outlooks. For example, the S&P 500 and the S&P/TSX indices have generated total returns of ~6.4% and ~6.5% on an annualized basis over this period.

Headlines Come & Go – This Too Shall Pass....

Year	S&P 500	S&P/TSX	Headline
2000	\$1,320.28	\$8,933.68	Y2K aftermath Tech bubble
2001	\$1,148.08	\$7,688.41	Recession, 9/11
2002	\$879.82	\$6,614.54	Corporate Accounting Scandals
2003	\$1,111.92	\$8,220.89	Bush Jr. declares War in Iraq
2004	\$1,211.92	\$9,246.65	U.S. has massive trade & budget deficit
2005	\$1,248.29	\$11,272.26	Record oil & gas prices
2006	\$1,418.30	\$12,908.39	Housing bubble bursts
2007	\$1,468.36	\$13,833.06	Sub-prime loan crisis
2008	\$903.25	\$8,987.70	Banking and credit crisis
2009	\$1,115.10	\$11,746.11	Jobs Recession
2010	\$1,257.64	\$13,443.22	Sovereign debt crisis
2011	\$1,257.60	\$11,955.09	Eurozone crisis
2012	\$1,426.19	\$12,433.53	U.S. fiscal cliff
2013	\$1,848.36	\$13,621.55	Federal Reserve begins to taper
